RESCAPE LANDSCAPE MAINTENANCE QUALIFICATION TRAINING

The course provides landscape maintenance professionals with:

- **Understanding** of ReScape's ecologically based, whole systems approach to the management of public and private landscapes
- **Knowledge** of the effects of landscape maintenance practices on the health of our communities and the San Francisco Bay Delta watershed
- **Information** about habitat restoration, local plant communities, and the benefits to biodiversity
- **Hands-on experience** with practical, effective techniques such as sheet mulching, building live soil, and irrigation maintenance
- **Recognition** of the global connections between soil health, waste management, water conservation, air and water quality, greenhouse gas reduction, urban forestry and carbon sequestration
- **Competitive advantage** as a qualified professional in the landscape maintenance marketplace
