RESCAPE LANDSCAPE DESIGN QUALIFICATION TRAINING

The course provides landscape design professionals with:

- **Understanding** of ReScape's ecologically based, whole systems approach to the design of public and private landscapes
- **Technical information** and resources to create regenerative landscapes
- **Information** about habitat restoration, local plant communities, and the benefits to biodiversity
- **Interactive experiences** with practical, effective techniques such as sheet mulching, building live soil, and irrigation installation
- **Recognition** of the global connections between soil health, waste management, water conservation, air and water quality, greenhouse gas reduction, urban forestry and carbon sequestration
- **Competitive advantage** as a qualified professional in the landscape design marketplace
- **Prerequisite** to apply to be a ReScape Qualified Rater
